Background and Layout of the Project

Income Tax Department of India

So we are allotted the html project of Income Tax Department and we are supposed to do with the help of the things we have learnt in our class
So the project is done with the help of HTML(Hypertext Markup Language),CSS(Cascading Style Sheet)and Forms. As we know HTML is the most basic building block of the Web. It defines the meaning and structure of web content. So here at first we are using the html to describe the appearance of the project . And to change the appearance of the web design we are using CSS. It is supported by all browsers and is designed primarily to separate the document content from document presentation.

And Since the main motto of the website is to get logging you in with the help of google forms which means it will accept your requisite if you are a user to the income tax you have the allowance to get into it.

In this project lots of information is also been delivered with the help of different radio buttons which a normal website of income tax department always shows such as About us link , Feedback and surveys of the website and various ways to contact the domain. It also consisted of the various information conveyed to the user about their website as well it also shows latest news conveyed by the government about the income tax;

And it also consisted of FAQs section where Frequently Asked questions are asked by the user and their answers are conveyed properly without fail and were kept aside for other user to convey and solve the same problem.

It has also the Quick Link section where as a dummy we can link the users pancard with addhar card.

It also has ITR(Income Tax Return) for the following candidate who have already log in to their

account. We have also put dummy logo of the income tax   department

And to make the project more sequential we have used Bootstrap which is an open source toolkit for developing HTML,andCSS . Bootstrap is a worlds most popular front end component library in a web.

Since it is a group task we have divided our work on this project.
Sonu as our group member made the breaking news column.
Vishnu and Srinjay has made the various forms such as login and signup page which means the password and user name text fields and its backend as reset and forgot password page.
Sonu has also made the   About , Contact us and feedback slot and its backend pages.
Vishnu made the Quick links backend pages such as Instant e pan , link Aadhaar ,Submit Forms and Itr status pages.
Srinjay made the FAQ's backend pages such as General FAQs , FAQ's on filling return of income .
And the designing background and images of the project has been discussed among ourselves.

BONAFIDE CERTIFICATE

Certified that this project report "INCOME TAX DEPARTMENT OF INDIA" is the bonafide work of SRINJAY MONDAL,VISHNU KUMAR AND SONU KR. BHARATI who carried out the project work under my supervision.
